25X1 25X1 25X1 25X1	Between 11 a.m. and 1 p.m. on 28 September 1963, the entire Proceedede billeting area, Installation VI, was inspected by two Soviet generals. a VP general, allegedly General Mentzsch, and several Soviet and EVP officers. The inspection commission left the installation lowerd Council in 13 sections.				
25X1 25X1	a VP general, allegedly General Rentzsch, and several Sowiet and EVP officers. The inspection commission left the installation lowerd Council in 13 sedans				
25X1 25X1 25X1 25.	a VP general, allegedly General Rentzsch, and several Sowiet generals.  a VP general, allegedly General Rentzsch, and several Sowiet and EVP officers. The inspection commission left the installation lowerd Cornelow in 13 sedans  Prior to 16 October, Blocks A and B were occupied to capacity, while two quartering buildings of Block C were still empty. A brick walk two meters high was being built between the road and the installation. A total of 213 standardized houses including 120 two-family houses were nearing completion northwest of the billeting area. The motor vehicle garages and shop buildings of the installation were still empty. The spur track from Cumnitu via Spechtberg to the installation is scheduled to be extended as far as Grambow in the near future.  The morning of 6 October, about 900 men from the Block C practiced marching in review, Soviet style. On 3 October, about 900 men had fallen in in the area of Block C for an address by Lieutenant Colonel Fette, allegedly commanding officer of this unit. On the same day, four groups of eight men each were seen doing basic training with carbines in the billeting area. About 90 men who carried spades left the houses of Block C for training
